## 50 Youngsters In C. P. Rec Program

A total of 50 children had registered for participation in the Summer Recreational Program at the Canal Point School on Tuesday, the second day of the six-weeks' program sponsored by the County Board of Public Instruction, according to Herbert Miller, supervisor. The program worked out by Mr. Miller for the first week included tennis instruction from 8 to 9 a.m., followed by swimming classes at the municipal pool in the Pahokee City Park from 9:30 to 11:30 a.m., allowing a half hour each way for the trip to and from the pool which is being made by the children in a bus furnished without charge by the Lake Okeechobee Farmers Cooperative.

The afternoon of activities start at 1 p.m. with the playing of various games such as shuffleboard, table tennis and the like, continuing through the afternoon for children who enjoy these types of games. There is a story hour from 2 to 3 p.m. and softball and basketball games are scheduled for every afternoon from 3 to 5 p.m.

The children also have the opportunity of joining classes in arts and crafts during the afternoon sessions. Educational motion pictures, featuring travel and animal films, have been ordered and their showing will be included in the recreational program as soon as they arrive, according to Mr. Miller.

### Cinematic Chatter

By Malcolm Millar

Hello everybody! The magic of motion pictures to uncover hidden talents is aptly illustrated in the career of Janet Leigh. Miss Leigh, who was discovered by Norma Shearer in a photograph album, became a romantic star opposite such leading men as Peter Lawford, Gene Kelly, John Wayne, Enzo Pinza, Paul Douglas and Stewart Granger. Then the "Cinderella Girl" as quickly became a musical star on the screen when she appeared with Tony Martin in "Two On The Aisle," doing singing and dancing routines with an exuberance that belied her previous lack of musical experience. In the transference of dramatic to musical skill, Miss Leigh is not alone in Hollywood. Such top-notch musical stars asette Davis, Joan Crawford, Claudette Colbert, June Allyson, Marlene Dietrich and Peter Lawford at one time or another have been called upon to sing or dance or both. And, conversely, Hollywood roles have uncovered superb dramatic talents in headliners previously best known for singing and dancing. Among this group are James Cagney, Dick Powell, Rita Hayworth, Gene Kelly, Gene Nelson, Cyd Charisse, Van Johnson, Judy Garland, Betty Hutton, Dorothy Lamour and Donald O'Connor, and I could name a great many more. Let me add a last line by saying, If you have any talent whatever be sure and register for the Talent Scout Night shows, which start at the Prince Theatre, June 29 and the Hugo Theatre July 1st. See you at the movies—Mal.

### Power Company Names Robert Wall

Appointment of Robert W. Wall, Jr., former special agent in charge of the Miami FBI office, as personnel director of Florida Power & Light Company, was announced today by FP&L President Robert H. Fite.

With the announcement of the promotion of Wall, the FP&L president said, "Our \$332 million 10-year expansion program calls for a greatly expanded organization. During this expansion of our organization the selection and training of efficient personnel will be of vital importance."

Before joining FP&L in 1953 as executive assistant to Fite, who was then vice president and general manager of the company, Wall was head of the local office of the Federal Bureau of Investigation. During the time he was in charge of the FBI office here he was recognized as one of the FBI's outstanding agents and had the distinction of being the second youngest agent in charge of a field office.

Wall is a native Mississippian, and was educated at the University of Mississippi, where he received Bachelor of Arts and Bachelor of Laws degrees. After entering the FBI in 1940, he was on confidential assignment outside the United States during the war and later served as agent in charge of the Albany, N. Y. FBI office. For three years, he was assigned to the FBI's Washington headquarters, where he worked on the Federal employee loyalty program. ●

### "Florida Aflame" Is Assured In Pinellas

SAFETY HARBOR—FLORIDA AFLAME, the historical drama of the Seminole Indians, was assured of permanent home today when Pinellas County commissioners affixed their signatures to a contract calling for the construction of a \$65,000 amphitheatre at Philippe Park on Old Tampa Bay. This money was appropriated in view of the great acclaim which the drama drew in its initial season last summer at Lake Wales. Thus, Pinellas County, in securing this great attraction, won out over some dozen other areas which were bidding for the attraction.

The drama is to be produced by a non-profit corporation, Florida Seminole Association, which has leased the production rights from the former owners. Author-producer John W. Caldwell announced at a recent meeting that the drama will open January 22, 1955, and will run nightly except Mondays through the 17th of April. Thereafter, Florida Aflame will be shown for approximately 10 weeks each summer and 12 weeks each winter.

The new amphitheatre, which has been designed expressly for this production, will be constructed immediately. The producers expressed great satisfaction over the location which is only about five miles from the intersection of US 19 and US 60, just east of Clearwater. This places the theatre within a 30 minute drive of almost one-half million residents. ●

Mr. and Mrs. W. P. Culberson and children have gone to Mountain City, Tenn., where Mr. Culberson will be engaged in the vegetable produce trucking business through the summer. ●

### From where I sit... by Joe Marsh

Right in front of Granny White's beautiful old house on Maple Avenue there's a brand-new sign: "Antiques. Inquire Within."

Now—don't get excited. Granny explained it all the other night—after we settled down in her parlor, me with my temperate beer, Granny with her tea.

I asked her if she was really going in the antique business. "Oh, no," says Granny, "I wouldn't sell anything. I put that sign up so folks would come in and talk—and look around. If they insist on a price, I tell them some outra-

geous figure! I guess I just like people," she said.

From where I sit Granny can be excused for her little ruse. She may be in her eighties, but her mind is young—and open. She's the kind of person who's made this town so wonderful. Granny not only likes people—but she respects them and their preferences and opinions. Come to think of it, "liking" and "respecting" mean much the same thing, don't they?

## It Is Unlawful For Any Person Or Persons To Engage In Business Under A Fictitious Name Unless The Name Is Registered

The fictitious name statute was recently changed by the 1951 Legislature and the News has the necessary forms for proper registration and advertising.

The charge for advertising the notice necessary four times is \$15.

As amended by the 1951 session, the law reads as follows:

"It shall be unlawful for any person or persons, as defined herein, to engage in business as herein defined, under a fictitious name as herein defined, without and unless said fictitious name shall be registered with the clerk of the circuit court of the county where the principal place of business is, which registration shall consist of filing with the clerk aforesaid an affidavit signed by all interested persons, stating under oath the names of all those interested in the business enterprise, the extent of the interest of each, and the fictitious name under which said business is carried on. Said registration may not be made until the person or persons desiring to engage in business under a fictitious name shall have advertised his or their intention to register said fictitious name at least once a week for four (4) consecutive weeks in some newspaper as defined by law in the county where said registration is to be made, and said registration shall not be accepted by the clerk of the circuit court except upon receiving proof of such publication."

Claude Crapps, III, 16-year-old Live Oak high school student, has been selected as this year's winner of the Florida co-operative Future Farmers of America forestry program, receiving the \$125 award from the Seaboard Airline Railway.

## WHICH ONE DO YOU WANT?

*you can have your dream house—this easy way!*

A dream? Not at all. Thousands of people with modest incomes have been able to save the down payment, or the whole price, of the home of their dreams—because they invested in U. S. Savings Bonds on the Payroll Savings Plan. Look at the chart on this page. See how you can accumulate enough money for the down payment on a home. Or enough for your children's college education or a retirement income. *And by saving only a few dollars a week, too.*

The answer is that you save *systematically* on the Payroll Savings Plan. All you have to do is tell your pay office how much you've decided to save each payday (it can be as little as a couple of dollars). After that your money is saved for you, before you get your salary. Then each time enough has accumulated, it is invested in a Bond, and the Bond turned over to you.

And remember—your U. S. Savings Bonds now will bring you an average of 3% interest, compounded semiannually, for 19 years and 8 months. That's why the money you put into Bonds now grows to such a surprisingly big sum.

Why don't you start—today? Sign, where you work, for the Payroll Savings Plan. Or, if you're self-employed, have your banker enroll you in the Bond-A-Month Plan. It's as easy as the Payroll Savings Plan:

*How you can reach your savings goal  
on the systematic Payroll Savings Plan*

	If you want approximately \$5,000	\$10,000	\$25,000

Each week for 19 years and 8 months, save...	\$3.75	\$7.50	\$18.75

This chart shows only a few typical examples of savings goals and how to reach them through Payroll Savings. You can save any sum you wish, from a couple of dollars a payday up to as much as you want. The important thing is, *start your Plan today!*

## Christian Science Group Of Canal Point

The vital importance of understanding the inspired Word of the Bible spiritually will be brought out at Christian Science services this Sunday.

The Lesson-Sermon entitled "Christian Science" includes the following selection from "Science and Health with Key to the Scriptures" by Mary Baker Eddy:

"The Scriptures are very sacred. Our aim must be to have them understood spiritually, for only by this understanding can truth be gained . . . It is this spiritual perception of Scripture, which lifts humanity out of disease and death and inspires faith" (547: 23-25, 31-32).

From the King James Version of the Bible the following passages will also be read:

"For ever, O Lord, thy world is settled in heaven . . . O how love I thy law! It is my meditation all the day . . . Thy testimonies are taken as an heritage for ever: for they are the rejoicing of my heart" (Psalms 119: 89, 97, 111).

The Golden Text is from Isaiah: "Awake, awake; put on thy strength, O Zion; put on thy beautiful garments, O Jerusalem, the holy city" (52:1).

## Defense is your job, too!

THIS IS A DAY OF DREAMS COME TRUE . . . for the returning Korean War veterans pressing against the ship's rail and for their loved ones waiting on the dock. The counted days of waiting are over; the nightmare of war is behind them. These boys have been far across the seas doing a hard, dirty, bloody job . . . a job of defense—for you.

But defense is your job, too. It is our job to help make America's economy as strong and dependable as these men have made her military power. And your job can be not only easy but rewarding—in financial security for you and your family. Just buy U. S. Defense Bonds. Buy them now and buy them regularly. For your bonds and other forms of saving can make America strong. And in this warring world, strength is America's surest guarantee of peace.

So sign up for bonds today—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank. For your security and your country's, too, buy United States Defense Bonds regularly!

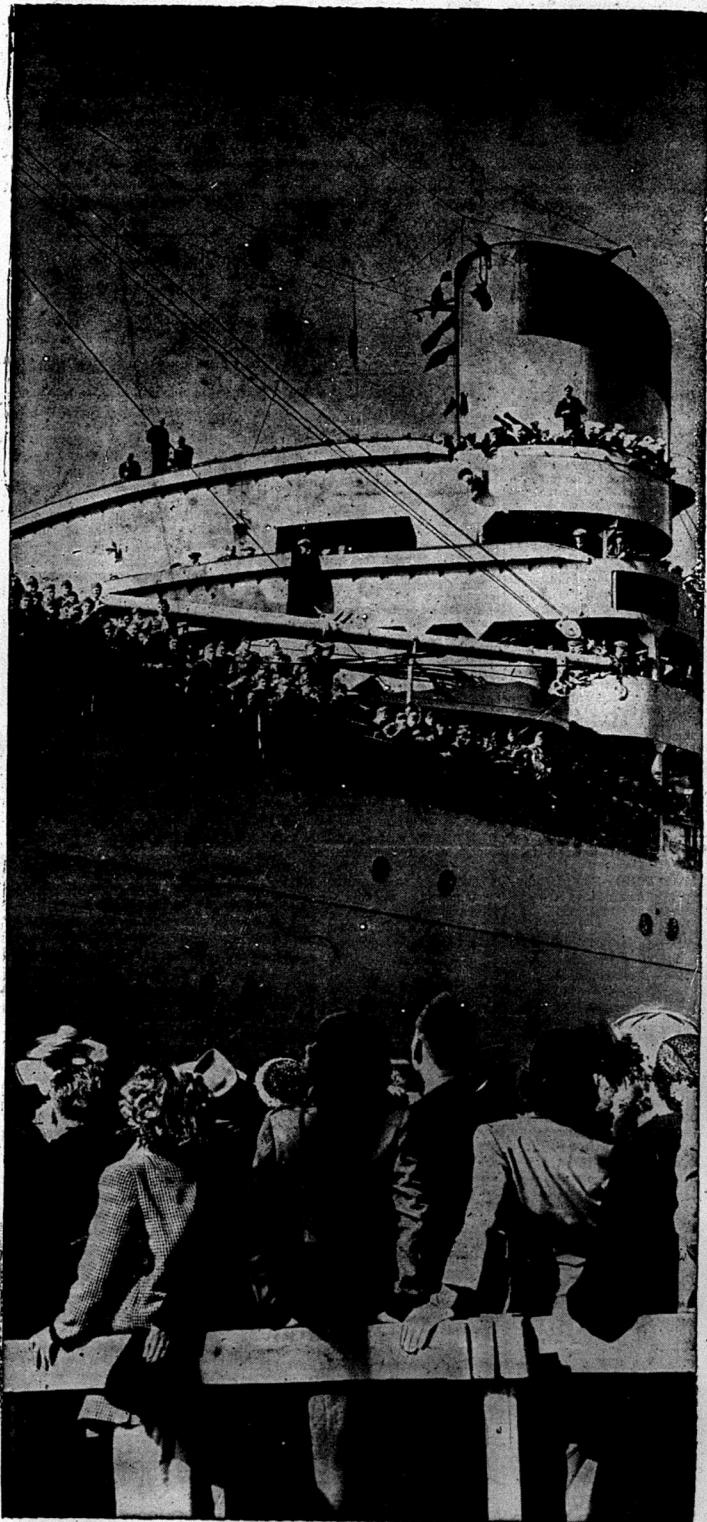

### The U. S. Defense Bonds you buy give you personal financial independence

Don't forget that bonds are now a better buy than ever. Because now every Series E Bond you own can automatically go on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not just \$25—but as much as \$33.33! A \$37.50 bond pays \$66.66. And so on. For your security, and your country's too, buy U. S. Defense Bonds now! Bankers recommend them as one of the safest forms of investment.

## Irrigation Can Increase Production If System Is Installed, Operated Properly

By IRA MILLER

Farm Electrification Bureau  
So you're thinking of installing an irrigation system. It's a good thought and a productive one. Be sure though, that you get the right kind of system and that you have an ample supply of water available for

turture enabled his herd to continue milk production through the summer without the customary hot spell slump.

Now a few words of advice. If you plan to irrigate, start right by calling in an engineer from an irrigation system manufacturer. It is his responsibility to determine the ade-

Here are some quick summaries of irrigation "success stories" from various parts of the country. In Wisconsin irrigation increased the yield of potatoes by at least 100 bushels per acre; doubled the corn yield and tripled the hay crop. Irrigation, in Missouri, increased by 3,400 pounds the yield of snap beans per acre and by 8,700 pounds the per-acre crop of cucumbers. USDA tests in Tennessee recorded that irrigated pastures averaged 40% more standard cow-days of grazing, and also that cows irrigated pastures produced 84% more milk than those non-irrigated pastures. A report from an Alabama farmer said that he saved 30 tons of alfalfa through irrigation in dry weather, and that his irrigated pas-

ture of the water supply, and to experts with soil conservation experts and others on the crops to be irrigated, the texture of the soil and on laying out the right kind of system for your needs.

Costs of irrigation will vary according to the frequency with which the system is used. One test case in Vermont, however, showed that a 7½ horsepower electric motor delivered one acre inch of water in about three hours for 18 cents per hour. This is lower than the cost of operating the pump with a tractor and free this machine for other work. One other point: the cost of your portable sprinkler or gated pipe systems does not decline with lack of use. If you have the water, it will pay you to get maximum use out of your system by irrigating additional crops. The added electric power needed for a more extensive job, and the work required to move the laterals from field to field are small in relation to the results obtained.

caused a wreck.

There were 499 vehicles with faulty tires, including those worn smooth and slick or blowouts, 230 vehicles had mechanically faulty steering equipment and were involved in wrecks, and 103 had insufficient taillights. Other faults were in lesser numbers, but they all contributed, the patrol emphasized.

"A driver who fails to see that an automobile or truck is safe for driving on the highway is just as negligent as a drunk driver, or a speeder or anyone else who contributes to the biggest inexcusable slaughter in the world—death on our highways," declared Comdr. Kirkman.

### Game Commission To Develop Permanent JR. Sportsmen Camp

TALLAHASSEE — The Game and Fresh Water Fish Commission took initial steps last week in the development of the permanent Junior Sportsmen's Summer Camp at the Lake Eton area in the Ocala National Forest.

Charles W. Pace, Director of the Agency, reported that arrangements are now being made to set up a temporary installation for use this summer, based on using some of the constructions for future use.

This summer, approximately 100 youngsters from throughout the State will be accommodated in tents each week during the month of July, the time scheduled for the encampment sessions. In the future, it is expected that permanent cabins will be built.

The camp is the outcome of the Governor's Camp Committee headed by Cecil Webb, Chairman of the State Road Department, and composed of various sportsmen and conservationists. The Committee recommended leasing acreage in the forest and developing the site for use by members of the organized Junior Sportsmen's Clubs in the state.

It was emphasized by Pace that although the program was being sponsored by the Game Commis-

sion, by no means would only game and fish conservation be stressed. "Youngsters attending this camp will be taught wise use of all our natural resources, and instructors from various other agencies will be recruited to lend their talents to this program," added Pace.

Florida was one of the leading states in the country in organizing Junior Sportsmen's Clubs in an effort to acquaint its youngsters with the need for resource conservation. In the past few years agencies from many other states have picked up the idea as a conservation-education medium. Pace said that the erection of the camp should do much to expedite the entire program as far as Florida was concerned.

### Legion Plans To Install Officers

Mrs. Effie Allen of South Bay, immediate past president of District 9, was a visitor at the meeting and reported on the department convention which she attended in St. Petersburg.

"What to do in Case of Accident" is an informative booklet for motorists. It is available through the Tampa Motor Club, Tampa, Florida.
